

The Colorado Health Observation Regional Data Service (CHORDS): Creating a Shared Distributed Data Network for Local Public Health and Research Needs

PHICONFERENCE.ORG • August 20-23 • HILTON ATLANTA

Presenters

- Rachel Zucker, Adult and Child Consortium for Health Outcomes Research and Delivery Science (ACCORDS)

BACKGROUND: CHORDS

PHICONFERENCE.ORG • *August 20-23* • HILTON ❄️ ATLANTA

CHORDS is a network conceived in 2011 that uses electronic health record (EHR) data to support public health evaluation, monitoring and research efforts.

CHORDS: A Primer

- **Data Partners:**
Twelve health provider organizations in Colorado
- **Data Users:**
Public health agencies serving the seven-county Denver Metro region and three public health agencies serving northern Colorado counties and local researchers from a variety of fields
- **Goal:**
Expanded use of EHR data to achieve public health and research goals through reliable and location-specific information
- **Funding:**
Primary support is provided by the Colorado Health Foundation (CHF); two-year renewal of grant began May 2018

CHORDS Data Partners

Health Systems

- Children's Hospital Colorado
 - Denver Health
- Kaiser Permanente Colorado

Mental Health Centers

- Mental Health Center of Denver
- Jefferson Center for Mental Health

Safety Net Providers

- Clinica Family Health
- Colorado Alliance for Health Equity and Practice
 - Colorado Coalition for the Homeless
 - High Plains Community Health Center
 - Metro Community Providers Network
 - Salud Family Health Centers
 - Clinica Tepeyac

CHORDS Data

- Approximately 3 million patients' EHR data
- Limited dataset
- Geocoded home addresses

CHORDS: A Primer

- **Data Partners:**
Twelve health provider organizations in Colorado
- **Data Users:**
Public health agencies serving the seven-county Denver Metro region and three public health agencies serving northern Colorado counties and local researchers from a variety of fields
- **Goal:**
Expanded use of EHR data to achieve public health and research goals through reliable and location-specific information
- **Funding:**
Primary support is provided by the Colorado Health Foundation (CHF); two-year renewal of grant began May 2018

CHORDS Catchment in Colorado

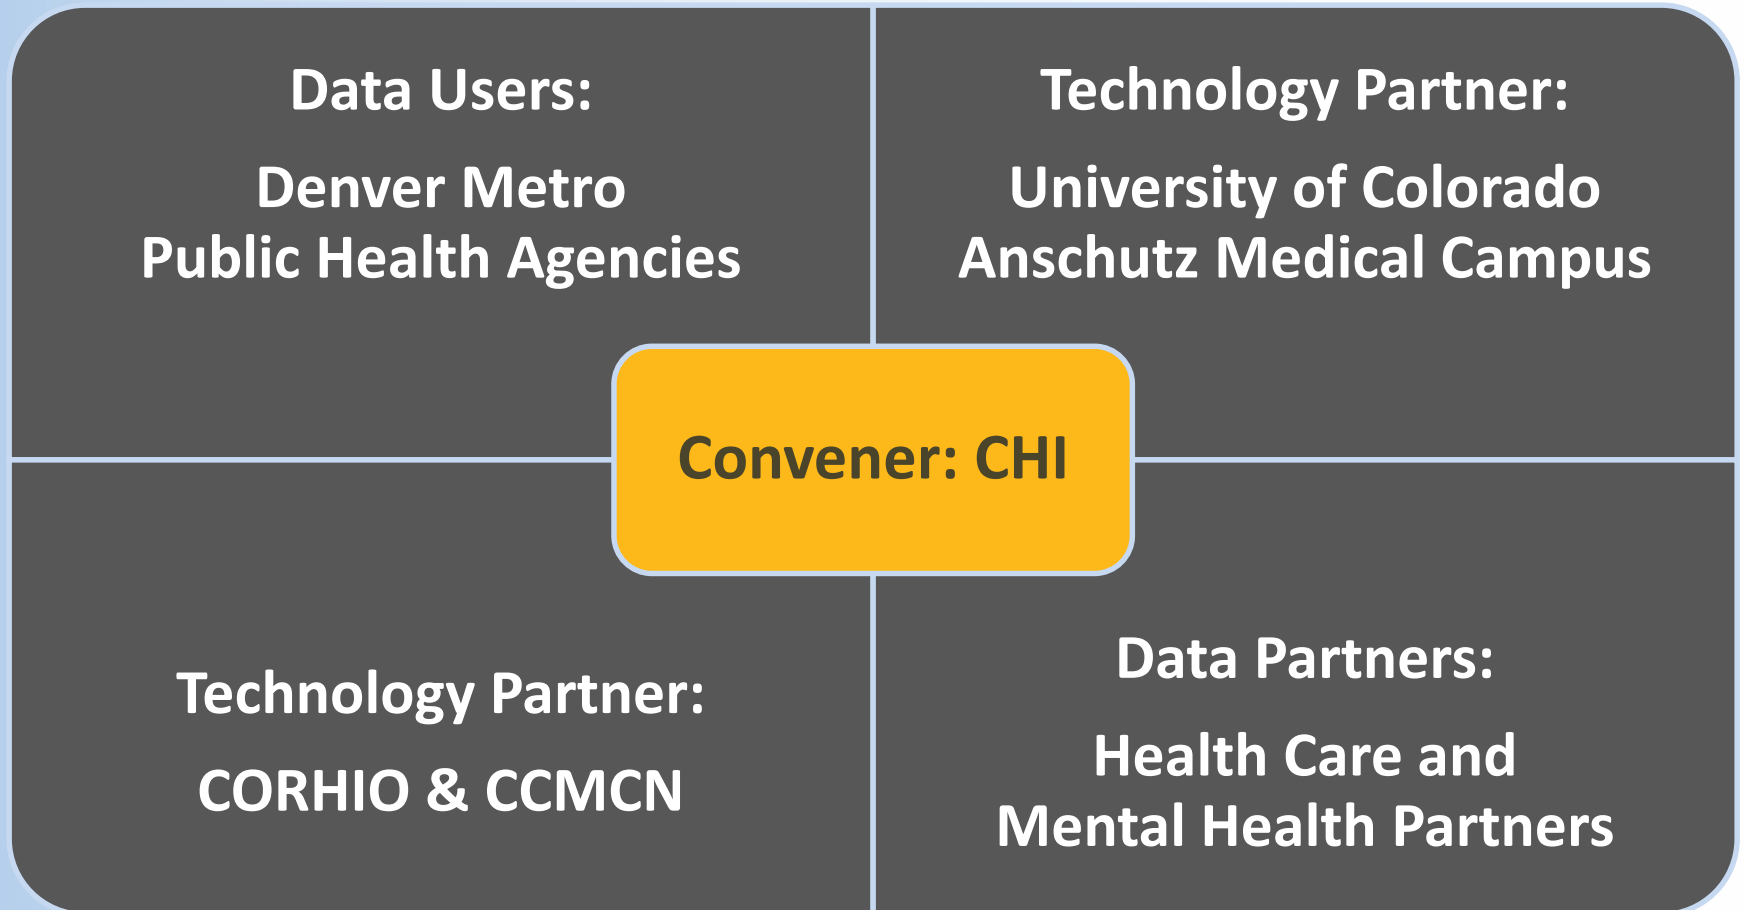

CHORDS Coverage

Colorado County	Coverage (CHORDS Patient Population ÷ ACS 2011-2015 Population estimates)
Adams	32%
Arapahoe	21%
Boulder	19%
Broomfield	20%
Denver	36%
Douglas	12%
Jefferson	21%
Larimer	7%
Weld	11%

CHORDS: A Primer

Primary support is provided by the Colorado Health Foundation (CHF); two-year renewal of grant began May 2018

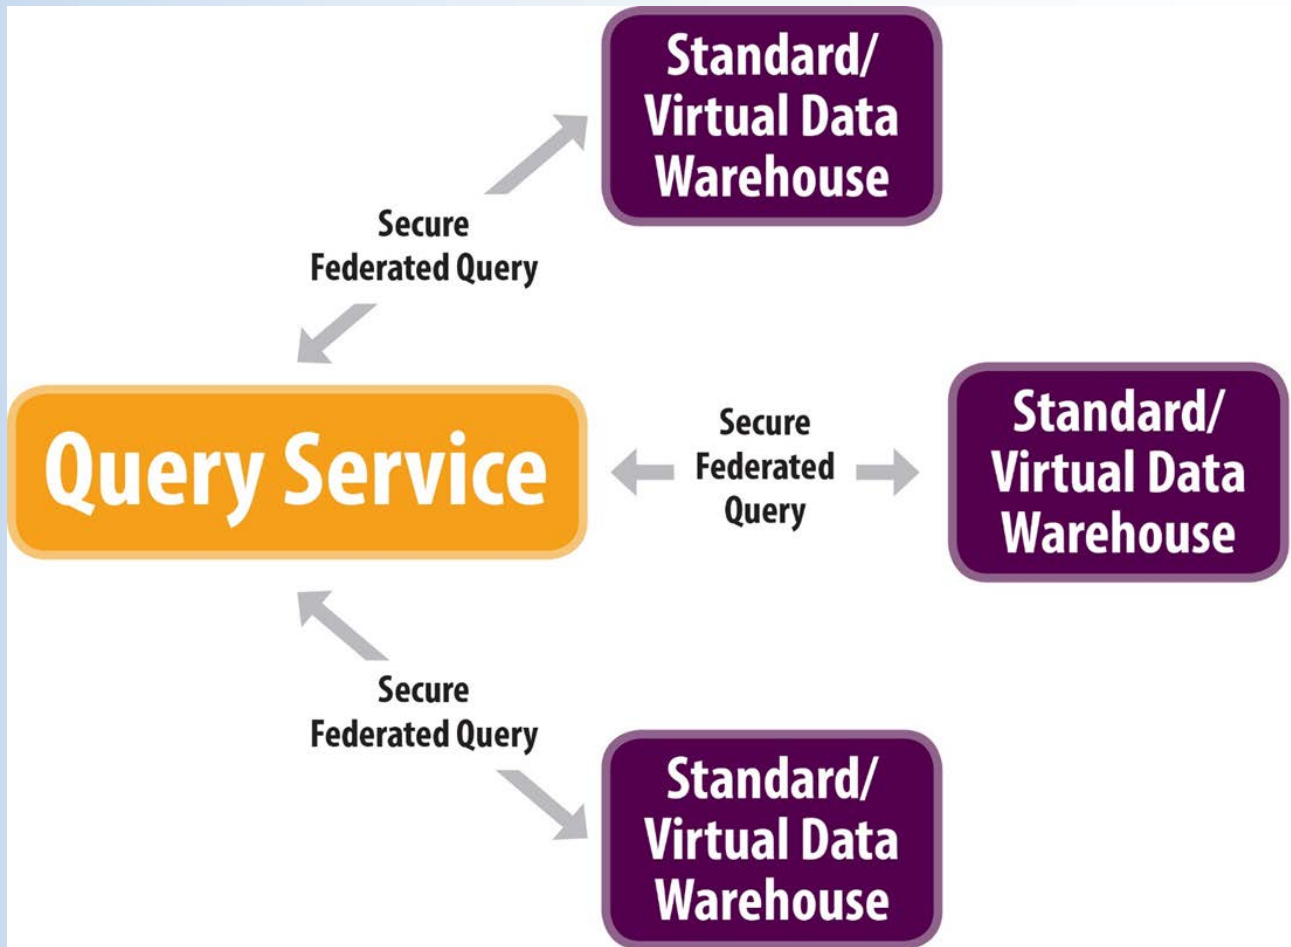

The CHORDS Network

BACKGROUND: POPMEDNET

PHICONFERENCE.ORG • *August 20-23* • HILTON ❄️ ATLANTA

Federated Model for Secure Data Sharing

PopMedNet

- Open-source application to facilitate data sharing among multi-site health data networks
- HIPAA-compliant distributed infrastructure

PopMedNet Portal

- Web-based app for query distribution

DataMart Client

- Windows application for query execution and response installed at each site

Web Service API

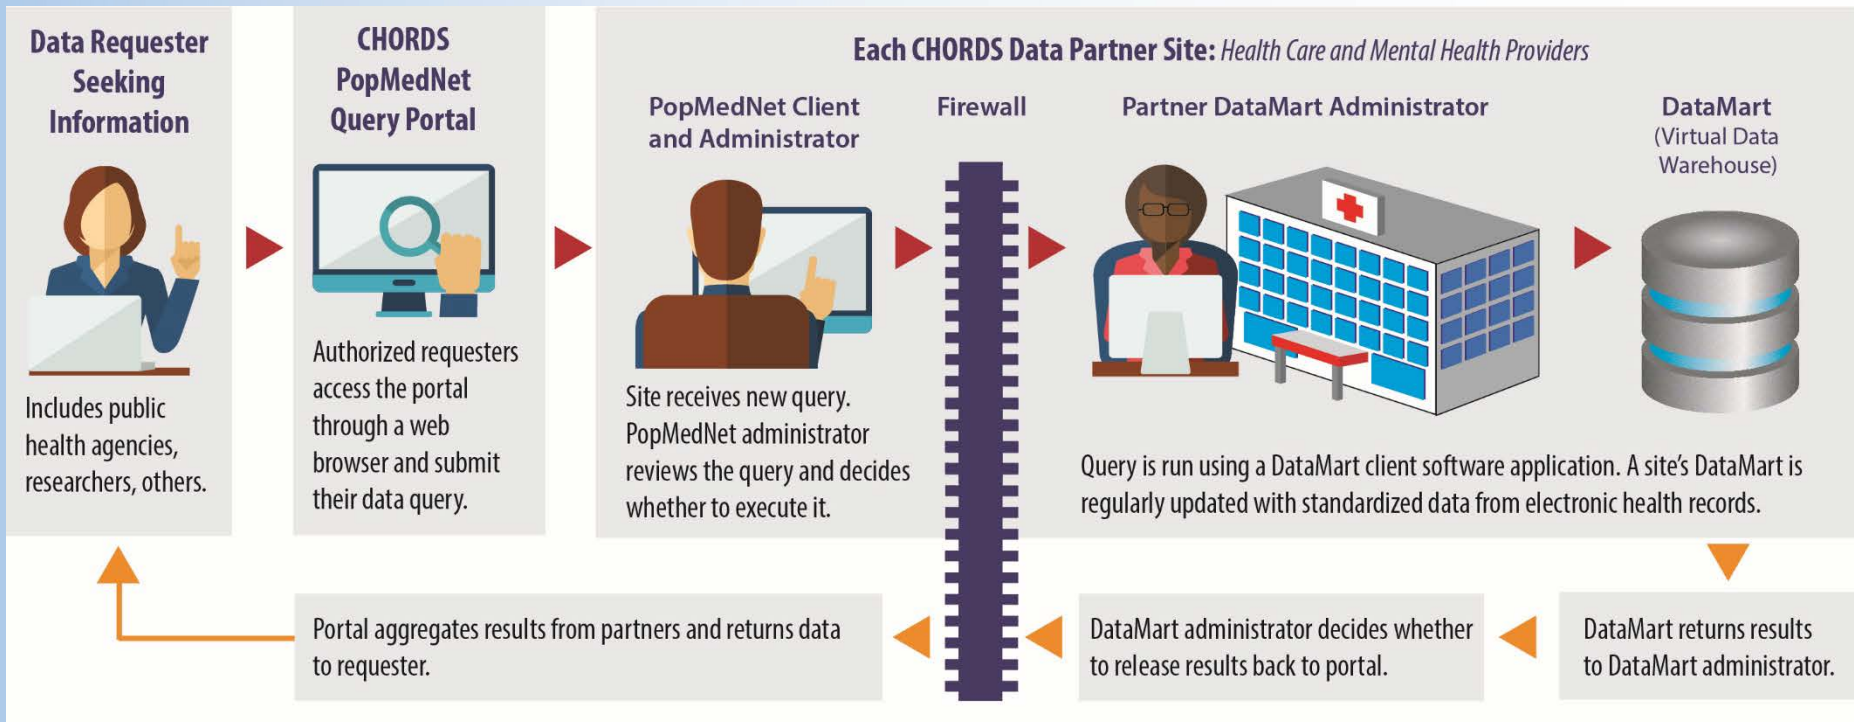

- Implements application logic to process requests against network(s)

PopMedNet

- Scalable; used by several regional and national networks:

The CHORDS Common Data Model: VDW

- **Encounters**
- **Diagnoses** (ICD-9/-10 codes)
- **Procedures** (ICD-9/-10; CPT, HCPCS)
- **Social History** (e.g., tobacco, alcohol, and/or drug use)
- **Laboratory Results** (e.g., test type, date of test and result)
- **Patient Demographics** (e.g., age, gender, race, ethnicity)
- **Patient Residence and Community Factors** (e.g., census tract of residence, American Community Survey socioeconomic data)
- **Prescribing** (e.g. written prescriptions; rxnorm; prescribing md, quantity, refills)
- **Vital Signs** (e.g. height and weight; diastolic and systolic blood pressure)
- **New for 2019: Benefits, Linkage**

Enhancing Data Reliability

- Many existing data sources rely on self-reported measures
- CHORDS uses EHR data, accessing measurements entered by providers

Maintaining Patient Privacy

- CHORDS provides aggregated data for use by public health agencies
- Information cannot be traced back to individual patients – limited data set
- Each data partner retains full control over their patients' data – opt out model

NETWORK USES

CHORDS Network Use

- **Public Health**

- Retrospective surveillance

- Disease prevalence across demographic, geographic strata
- Adapters standardized for specific case definitions

- **Healthcare Research**

- Infrastructure (governance, analytic support) for internal/external research using CHORDS data

Public Health and Research Requests

- **Public Health Topics:**

- Depression
- Mental Health and Pregnancy
- Hypertension
- Diabetes
- Adult/Child BMI
- Tobacco Use
- Opioid Use Disorder
- Marijuana

- **Research Topics:**

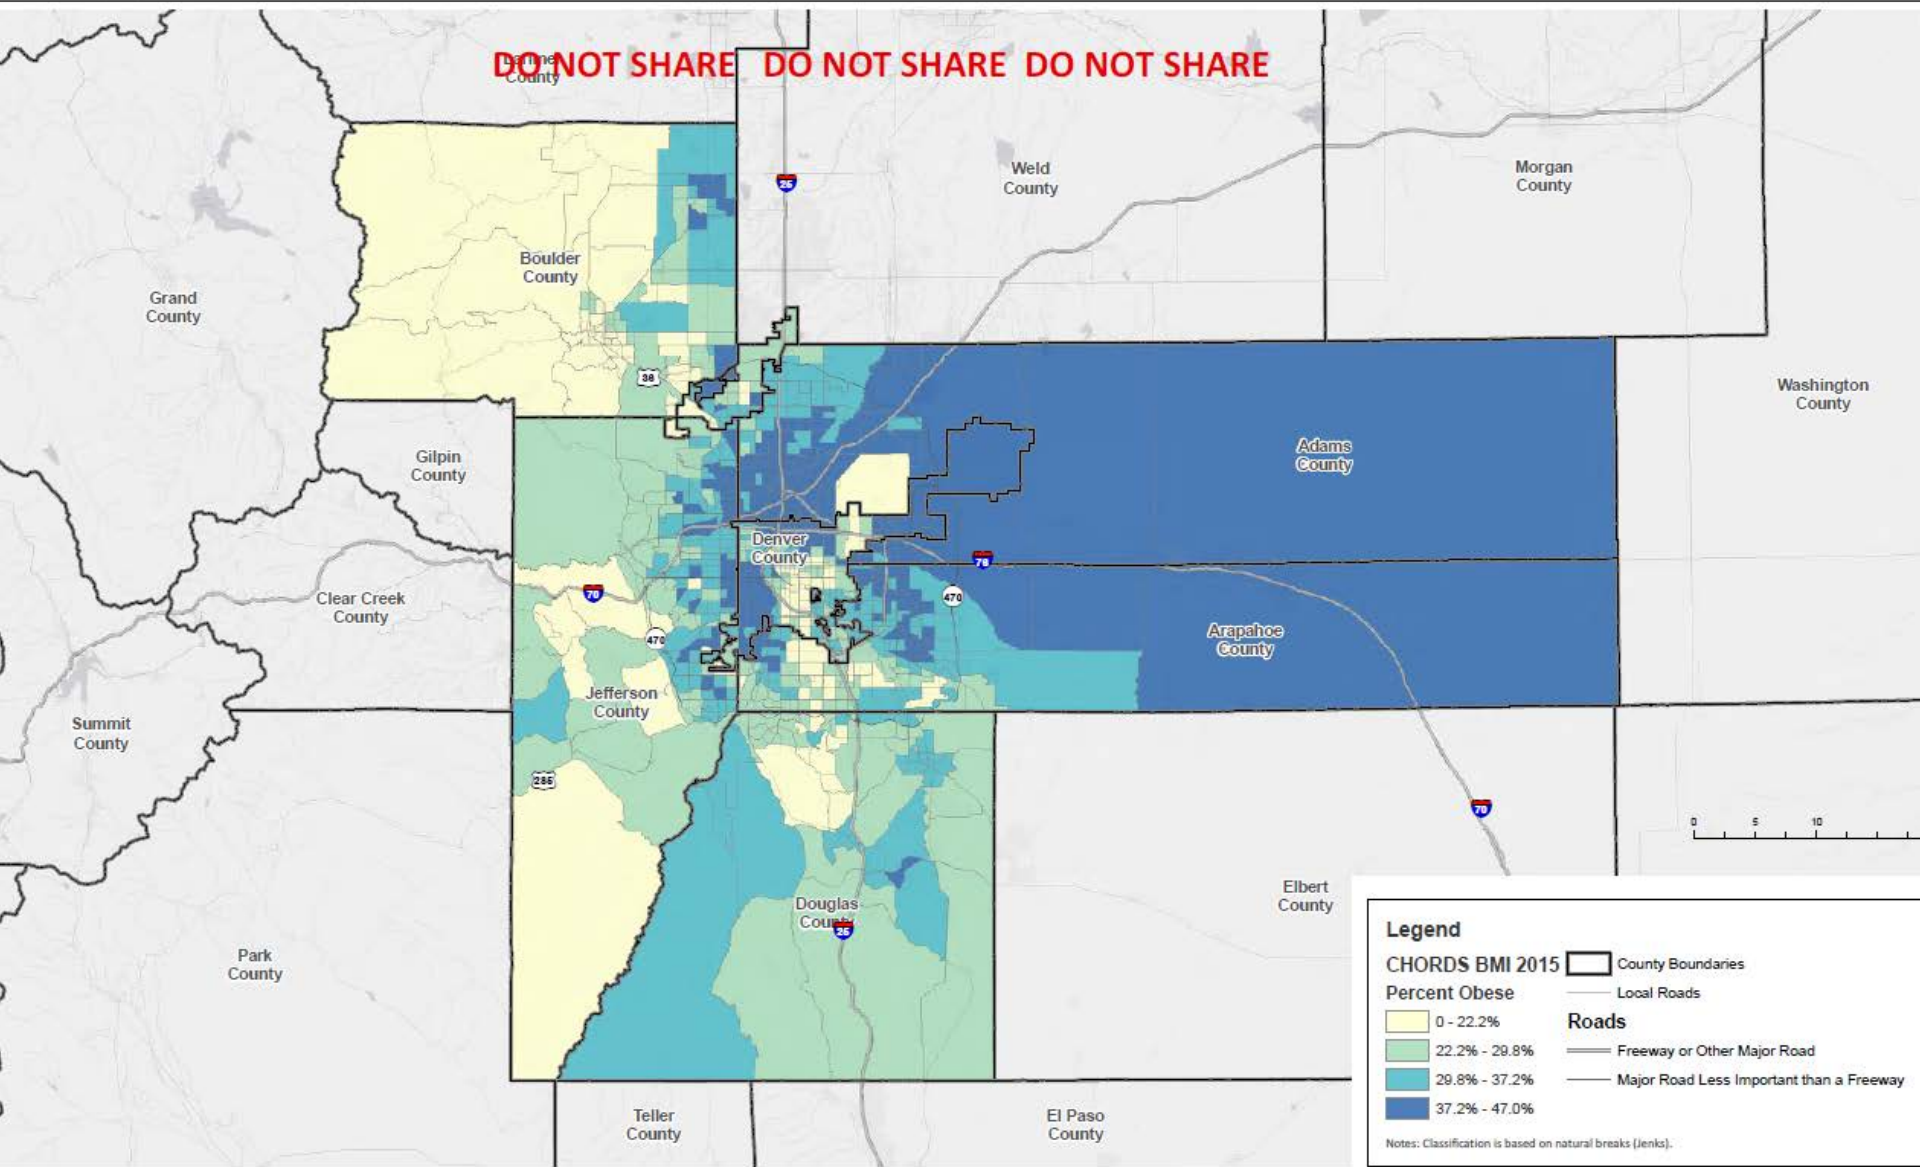

- Asthma Exacerbation Index
- Adolescent Pregnancy and LARCs
- Spinal Fusion Procedures and Opioids

CHORDS Testing | BMI: Percent Obese by Census Tract (Metro Denver Region, 2015)

Tri-County Region, Colorado

Source: CHORDS, 2015

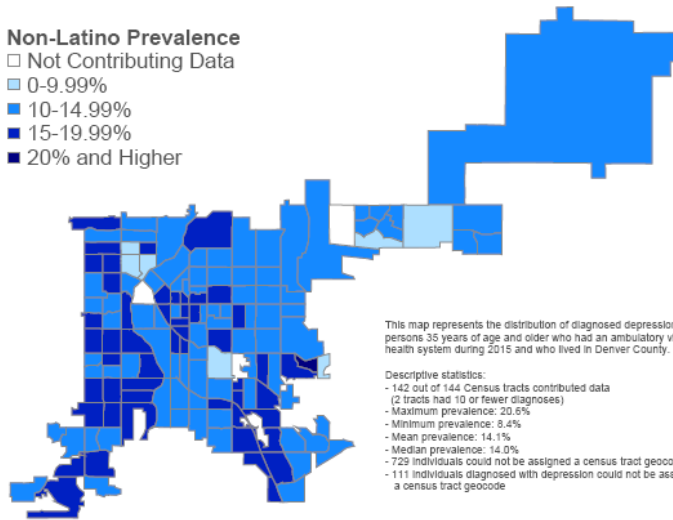

Date Created: August 24, 2017

Public Health Use Case: Depression Among the Latino Age Wave

Prevalence of Diagnosed Depression Among Non-Latino Adults 35 Years and Older in Denver County, by Census Tract, 2015

- Non-Latino Prevalence**
- Not Contributing Data
 - 0-9.99%
 - 10-14.99%
 - 15-19.99%
 - 20% and Higher

This map represents the distribution of diagnosed depression among non-Latino persons 35 years of age and older who had an ambulatory visit at a participating health system during 2015 and who lived in Denver County.

- Descriptive statistics:**
- 142 out of 144 Census tracts contributed data (2 tracts had 10 or fewer diagnoses)
 - Maximum prevalence: 20.6%
 - Minimum prevalence: 8.4%
 - Mean prevalence: 14.1%
 - Median prevalence: 14.0%
 - 729 individuals could not be assigned a census tract geocode
 - 111 individuals diagnosed with depression could not be assigned a census tract geocode

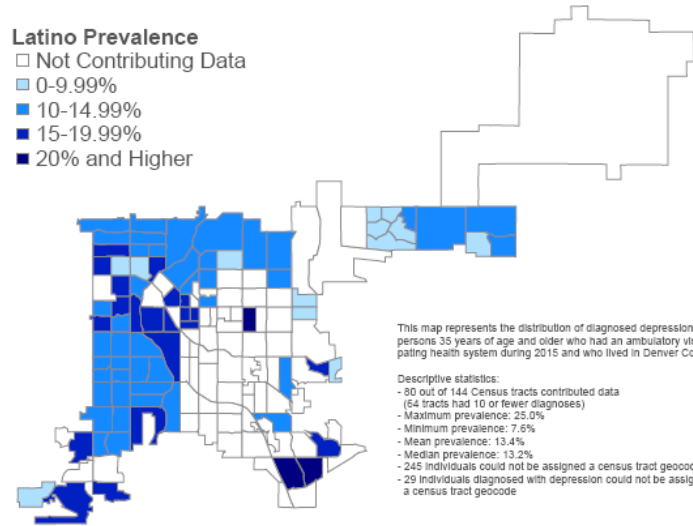

Data Source: Colorado Health Observation Regional Data Service (CHORDS)

Exploring CHORDS Data

The Colorado Health Observation Regional Data Service (CHORDS) is gathering and aggregating electronic medical record data from 11 health care and mental health providers in the seven-county Denver metro area. For the first time, researchers and public health agencies have access to clinical data to help monitor public health trends. CHORDS data can be used alone or in conjunction with survey data sources.

This dashboard compares the population covered by CHORDS — people who received care at one or more of the participating health providers — with the population included in the American Community Survey. Comparisons are based on 2015 data and are available by county, age, gender and race.

Use the demographic filters below to explore CHORDS coverage data

Demographic Filters

Age

- Under 18
- 18 and Over
- 65+

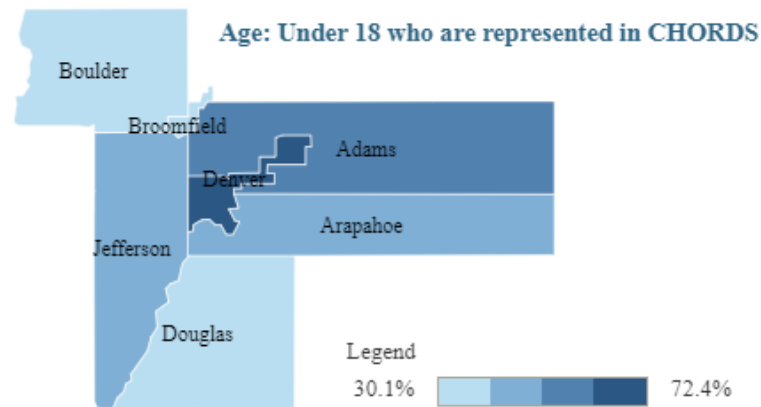

Gender

- Females
- Males

Total

CHORDS

Customizing CHORDS

- Linking and de-duplicating records across data-contributing sites

CHALLENGES

PHICONFERENCE.ORG • *August 20-23* • HILTON ❄️ ATLANTA

Data Partners

- Legal/regulatory
- Different technical resources

Legal/Regulatory

- Unique processes at each site
- Agreements required to share data
 - Reciprocal DUA
- IRB approval: site by site considerations
- Research vs. public health

Data Partners

- Legal/regulatory
- Different technical resources

Different Technical Resources

- Full IT team vs. summer interns/part time assistance
- Software licensing considerations
- Previous experience in other data networks

Data Partners

- ETL (Extract, Transform and Load) challenges
- QA efforts

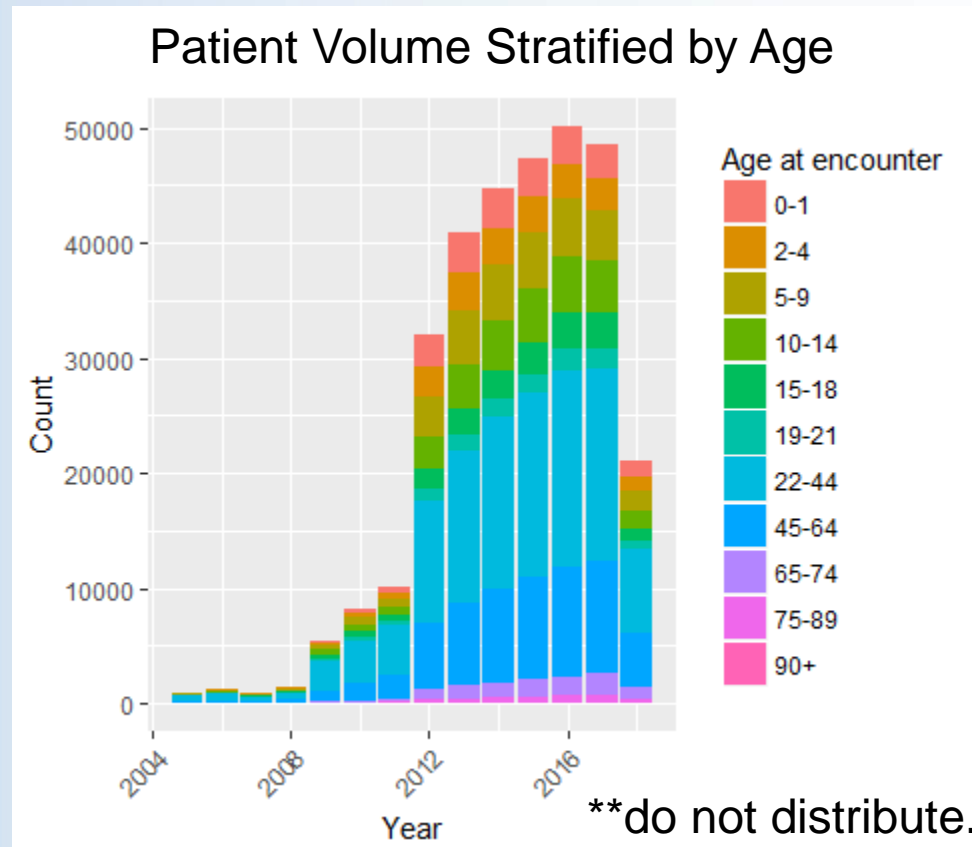

Data Partners: ETL

- Differing experience levels
- Site-specific decisions
- The mystery of the missing heights

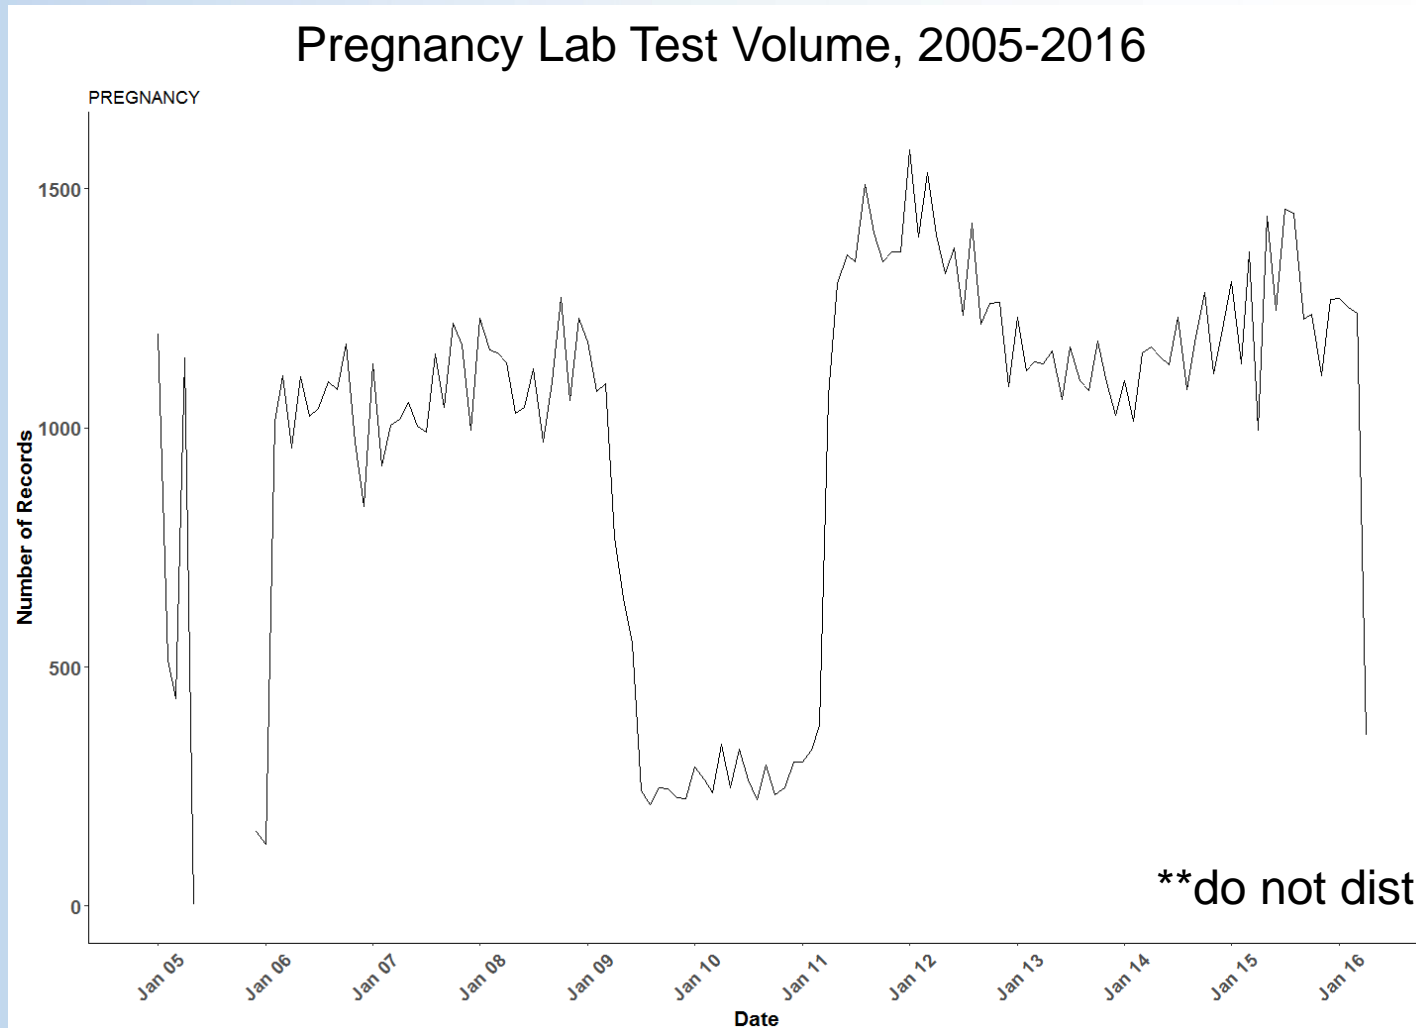

Data Partners

- ETL challenges

WHERE WE ARE NOW AND WHERE WE ARE GOING

PHICONFERENCE.ORG • August 20-23 • HILTON ❄️ ATLANTA

Geographic Area

- NOW:
 - Metro Denver area

Geographic Area

- GOING TO:
 - Northern Colorado/Front Range

Data Partners

- NOW:
 - 12 data partners contributing data

Data Partners

- GOING TO:
 - Adding new data partners, including two of the largest state-wide systems.
 - Adding new behavioral health data partners
 - New outreach

VDW

- NOW
 - CHORDS VDW 3.1
 - Assessed data model concordance with:
 - HCSRN VDW CDM: 98%
 - PCORnet CDM: 47%

VDW

- GOING TO:
 - Balance of specialized tables/fields vs. staying in alignment: point of no return?
 - CHORDS VDW 3.2: BENEFITS and LINKAGE tables
 - Next up: Social Determinants, Screening?

Software

- Customization: pros and cons
- Keeping up with the Joneses (aka new releases)
- Help from the Harvard Pilgrim development team

Where Else?

- Linkage and de-duplication
- Expanded Research Agenda

Linkage and De-duplication

- We've got an eMPI... now what?
 - Distributed data network design
 - Which record “wins”

Where Else?

- Linkage and de-duplication
- Expanded Research Agenda

Expanded Research Agenda

- Deep dive into newer tables
- New fields, lab tests
- Revisiting regulatory/legal processes at each site
